

Priya Nair

Senior Technical Product Manager

San Francisco, CA (open to remote) · priya.nair.pm@email.com · (415) 555-0182 · linkedin.com/in/priyanairpm

SUMMARY

Technical Product Manager with 9 years shipping developer- and data-facing products at cloud and infrastructure companies. Comes from an engineering background (5 yrs as a backend engineer) so she speaks the team's language and can go deep on architecture, APIs, and trade-offs. Known for turning ambiguous platform problems into shipped roadmaps.

EXPERIENCE

Senior Technical Product Manager · Aperture Cloud, San Francisco, CA 2020 – Present

- Own the developer platform (APIs, SDKs, CLI) used by 40k+ external developers.
- Led the API v2 redesign that cut integration time from ~2 weeks to 2 days; adoption hit 70% in two quarters.
- Partner daily with staff engineers on architecture and sequencing; write the specs the eng team actually builds from.
- Manage a pod of 2 associate PMs; both promoted under her.

Product Manager · Helio Systems, Remote 2017 – 2020

- Ran the data-pipeline product; shipped self-serve ingestion that became the top revenue driver.
- Drove 0 → 1 on the observability dashboard, from customer interviews to GA.

Backend Software Engineer · Cobalt Software, Austin, TX 2015 – 2017

- Built and owned billing + metering services (Go, Postgres).

EDUCATION

- B.S. Computer Science — University of Texas at Austin, 2015

SKILLS & NOTES

- Deep API / platform / developer-experience background; ex-engineer.
- Strong with SQL, experimentation, and roadmap prioritization.
- 9 years, two long tenures — stable. Currently passive.
- Comp expectation: \$210–235k base. Availability: 6-week notice.
